EDUARDO ARINE

DIGITAL PRODUCT DEVELOPER

Software engineering / Product / Applied AI / Gamification

Portfólio / Portfolio • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Digital product developer with continuous professional experience since 2016. Background in maintaining and evolving enterprise products, modernizing legacy systems, and building web and mobile solutions. Involved across architecture, data modeling, APIs, interfaces, and user experience, using Angular, TypeScript, C#/.NET, SQL Server, and complementary technologies. Combines product thinking, UX/UI, gamification, and practical AI-assisted development.

CORE SKILLS & TOOLS

Engineering Angular, TypeScript, C#, .NET / ASP.NET Core, REST APIs, SQL Server, PostgreSQL, Docker, Xamarin (earlier work)

Product & UX Solution architecture, UI/UX, prototyping, design systems, product modernization and evolution

AI & games AI-assisted development, agents and workflows, Unity/C#, gamification and interaction design

PROFESSIONAL EXPERIENCE

Ativvus → Arppen | 2016 – Present · Ongoing contract-based engagement

Focus: building, maintaining, and evolving enterprise digital products; continued work within the Comunidade ON ecosystem.

4Change | IT & telecom asset management · Continuously evolving product

- In 2016, built an iOS and Android application with Xamarin/C#, extending features of an existing VB.NET asset-management system.
- Contributed extensively to its modernization: architecture, SQL Server data modeling and persistence, .NET/C# APIs, Angular/TypeScript frontend, and UX/UI.
- Ongoing maintenance and evolution of an enterprise platform for mobile devices and telecom lines, with desktop-asset management now being added.
- Work spanning operational requirements, feature development, and iterative improvements to a long-running production product.

Comunidade ON | Customer-service platform · Current work

- Build and evolve web apps, services and APIs using Angular, TypeScript, and C#/.NET; contribute to operational interfaces, gamification, and applied-AI initiatives.

Axia | Operations intelligence and IoT

- Contributed from concept through product evolution across architecture, Angular web app, C#/.NET APIs, SQL Server, UX/UI, and some embedded C.

ADDITIONAL SELECTED PROJECTS

EOS | Transplant logistics · 2019

- Contributed to a solution for planning organ and medical-team transportation; developed its ASP.NET/C# web frontend.

ScoutEvo | Football technology · 2018

- Architecture, Unity/C# scouting data-collection app, ASP.NET/C# web interface and UI design; winner of a Flamengo-related innovation challenge.

Aedes Revenge | 2D mobile game · 2017

- Built a dengue-awareness game using Unity/C#, released as a Google Play beta; earned two academic awards and a top-grade graduation project.

Modo Campanha | Independent interactive portfolio · 2026

- Product concept, UX/UI and development of a bilingual, game-inspired portfolio using Angular, TypeScript, SCSS, Vitest and GitHub Pages.

EDUCATION

Technology Degree in Digital Games | FATEC Americana · graduated in 2017

Graduation project: Aedes Revenge.

AWARDS & RECOGNITION

- Best Game — Academic Category, FAEL 2016 (Aedes Revenge).
- Best Game — Academic Category, 2017 Game Showcase (Aedes Revenge).
- Aedes Revenge — final academic project grade 10/10 (2017).
- ScoutEvo — winner of a Flamengo-related innovation challenge (2018).
